Conveying his greetings to people on the eve of Telugu New Year, Lok Satta party President Dr. Jayaprakash Narayan today hoped that 'Nandana' at least will herald a fundamental change in the nature of politics and makes it relevant to people's lives.

In a media statement, Dr. JP pointed out that while people are dreaming of a bright future, politics is reminding them of the bitter past. While people want to soar to great heights, politics is dragging them back to middle-ages by denying young people opportunities. There is thus a disconnect between people and politics.

Dr. JP said that the situation can be retrieved because Indian youth are adventurous, innovative, confident and idealistic. They are building a new world unrecognizable to the earlier generation. They are the great source of our hope in future, he added.
